To Whom It May Concern:

Based on our positive experience with GCL Construction, we are more than pleased to recommend this company for your project. We are a real estate investment company with a portfolio of commercial and residential properties throughout South Florida and have been working with GCL for the past 14 months on a number of concrete restoration, roofing and stucco projects:

1. Reroof of warehouse property in North Miami
2. Reroof of 2-story retail property in Fort Lauderdale
3. Roof & stucco repairs for various multifamily properties throughout Broward & Miami-Dade
4. Roof repairs for 18-unit warehouse property in Miami Gardens
5. Concrete restoration of 3-story historic property in Hollywood
6. Stabilizing of the foundation for a villa in Hollywood
7. Repair tile barrel roof in Cooper City

The GCL entire crew – from owner, to field manager, to office staff – has shown much care in the completion of all our projects efficiently and with highest attention to detail.

GCL is currently working with our architect and structural engineer during the pre-construction design phase of a new 4-story mixed-use retail property. Their involvement has been critical to ensuring that the finished building is designed to stay within an extremely tight budget. We are appreciative of the number of insights they have provided to help us get over design hurdles. With their intimate involvement in the front end, we feel extremely confident that the construction phase will run smoothly. GCL has become an integral part of our development team and we cannot imagine working without them.

Should you wish to speak to us personally regarding any of the projects, feel free to contact me on my cell phone at 954-483-0713 or email [ohchiquita@aol.com](mailto:ohchiquita@aol.com)

Sincerely,

Anna Hua  
Manager, Chiquita Properties, LLC
